## PROJECTS

---

### PGLife

June 2024

- A full-stack web application designed to connect individuals looking for paying guest accommodations with property owners who want to list their properties. Key functionalities include property listing, search capabilities, and user-friendly interfaces for both property seekers and owners. Technologies used: HTML, CSS, JavaScript, PHP, MySQL, etc.
- Created a robust search system with location-based filtering and sorting options for finding accommodations.
- Enabled property owners to list and manage 100+ properties and track inquiries.
